A diferencia de lo afirmado cotidianamente, los peruanos confían más en los líderes empresariales que en los políticos, según una encuesta global de Ipsos.

Ipsos Global Trustworthiness Index 2021 entrevistó a 19,570 participantes en 28 países, entre el 23 abril y el 7 de mayo, 2021. Participaron alternadamente: Alemania, Arabia Saudita, Argentina, Australia, Brasil, Bélgica, Canadá, Chile, China, Colombia, Corea del Sur, EEUU, España, Francia, Gran Bretaña, Holanda, Hungría, India, Italia, Japón, Malasia, México, Perú, Polonia, Rumania, Rusia, Suecia, Sudáfrica, Turquía.

La confianza es la base del tejido social de un país. Lamentablemente, desde hace algo más de 10 años, en el Perú se ha venido perdiendo la confianza en el futuro y en los líderes de la gran mayoría de estamentos de la sociedad; tanto como producto de ausencias en el debate nacional, frivolidades, torpezas y corrupción, como por la siembra de narrativas negacionistas que oscurecieron nuestros logros.

En el siguiente cuadro se ve que las categorías de mayor confianza relativa son los líderes empresariales, los publicistas y los miembros de las Fuerzas Armadas.

Curiosamente, las categorías que generan más confianza en los países más desarrollados, los doctores, los científicos y los profesores, son los que generan menos confianza en el Perú.

Por otro lado, los ministros y los funcionarios públicos están muy abajo en el nivel de confianza.

Veamos el cuadro:
